SECTION 1.1 Ultra-Pro Digital Printing

Printed using latest Fujifilm pro lab, with state of the art 1440dpi head technology (with the first install in Canada 2010). Our Ultra-Pro printing delivers breakthrough colour, resolution, and consistency and contrast (deeper blacks and wider colour gamut compared to conventional photo printing technology). Our experienced technicians individually correct for density. Matte or Glossy finishes. For larger sizes and , fine art, and gallerie printing, see the Gallerie and Museum Etching Printing section.

SECTION 1.3 Canvas Giclee Wraps

We utilize the finest quality Hahnemuhle Monet Canvas for our giclee wraps, and the canvas wrap comes complete with hanging harness for sizes larger than 8"x10".

You have the option to wrap around the image (if there is sufficient framing area around the central subject for edging), or to add black, white, or coloured border for the canvas wrap edging. We use two wrapping kits. The standard gallerie wrapping kit has 1.25" edging, and we print the image 3" larger horizontally and vertically prior to wrapping. The large/pro gallerie wrapping kit has 1.75" edging, and we print the image 4" larger horizontally and vertically prior to wrapping. Please keep these edging sizes in mind, especially if you are choosing to wrap your image around the edging.

For the most part, we use the standard wrapping kit for sizes up to 16x24, and use the pro wrapping kit for larger sizes. We offer the below standard sizes, with custom sizes also available (please check for lead time to get the materials).

SECTION 1.4 **Monitor calibration, RAW processing, and custom colour**

We also provide custom digital services, including monitor calibration, RAW and HDR processing, and custom colour matching.

Monitor calibration starts at \$30 for laptops brought into our store. We use the industry leading X-Rite Eye-One Spectrophotometer to calibrate monitors. Calibration your monitor results in higher accuracy with ICC profiled output (like our Gallerie, Fine Art, and Canvas printing).

RAW and HDR and Artifact clearing processing allows you to achieve the best clarity and dynamic range from your digital images. We also perform HDR processing of JPEG images. The processing fee starts at \$20, and the estimate depends on the complexity, and if custom photoshop layer manipulation is required to achieve optimal balance and clarity in the image.

Custom Colour matching is an extra service, for which we offer two routes:

1. Matching a print to a supplied original. Starts at \$10+ depending on matching complexity and required precision.
2. Providing a test sheet with various corrections of the image. Starts at \$15 per test sheet (3 images on 8x10).

SECTION 2 PHOTO BOOKS, GREETINGS, GIFTS**SECTION 2.1 Gallerie Photo books – coming soon**

*Planned launch of Professional Gallerie Photobooks – January 2012.
